

UPTIME |

FUTURE
MAINTENANCE,
NOW

UPTIME - Unified Predictive Maintenance System – aims to develop an innovative predictive maintenance system for manufacturing industry. This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No. 768634.

JOIN UPTIME COMMUNITY!

Exploiting data from manufacturing system health monitoring as well as from other sources is a promising way to improve Overall Equipment Effectiveness (OEE). The **UPTIME project** is building a complete e-platform, comprising innovative components, fully adaptable and configurable to meet the needs of various industrial contexts. The **UPTIME platform** is based on the most advanced standards of Industry 4.0.

WHAT IS THE UPTIME PARTNER PROGRAMME?

Our Partner Programme provides information, use cases analyses, Software technology and assistance with the implementation of the **UPTIME solution** with proven benefits based on real industrial use cases.

If you would like to participate and benefit from new advances in predictive wwmaintenance, join the **UPTIME community!** Membership in the Partner Programme is **free of charge!**
